

Crypto101: Why Invest in GESARA Crypto Assets (10/26/2021)

NESARA/GESARA

GESARA X

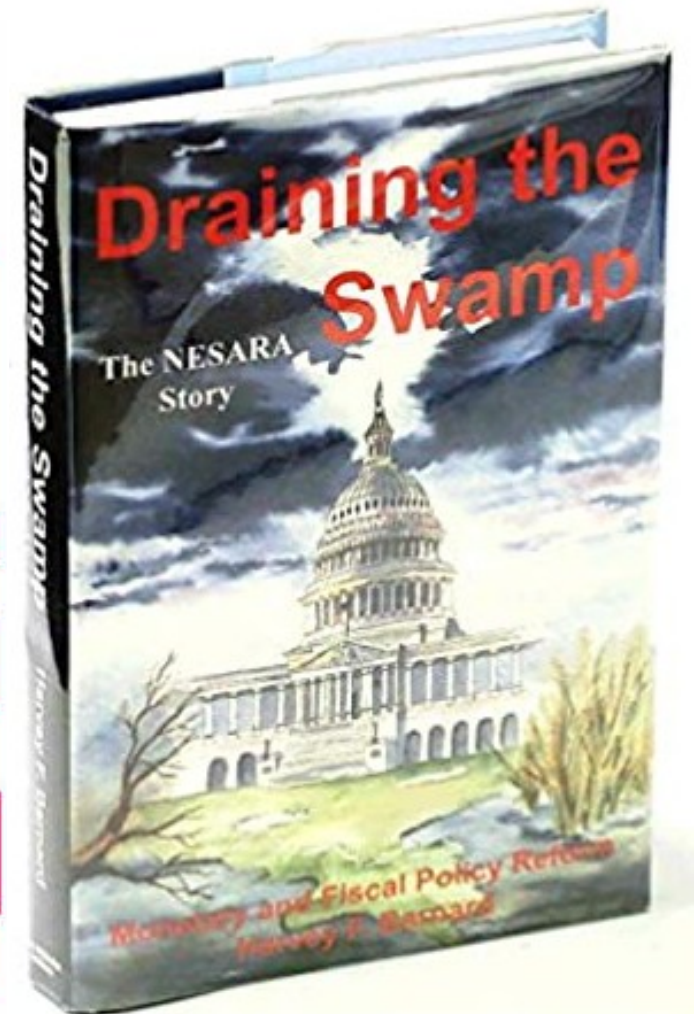

- North American/Global Economic Security And Reformation Act
- Boxes highlighted in PINK are relevant to CRYPTO
- All countries signed off, Phase 1 started in several countries already
- Trump has always hinted at GESARA "Drain the Swap"
- What happens after you destroy something? You rebuild it. That's what GESARA is. Q plan to save the world can be thought of loosely in 2 stages:
 - bringing down the Khazarians, releasing the world from slavery (physical, financial, mental, spiritual, energy) and eradicating them once and for all
 - rebuilding humanity and restoring Natural Law aka God Law (ethics and morals) in conjunction with Common+Constitutional Law (governance)

A law was passed in March 2000 and signed into law in October of 2000. This law is called
NESARA - National Economic Security and Reformation Act.
This law provides the following:

- Forgives credit card, mortgage, and other bank debt due to illegal banking and government activities
- Abolishes income tax
- Abolishes IRS; creates flat rate non-essential "new items only" sales tax revenue for government
- Increases benefits to senior citizens
- Returns Constitutional Law
- Establishes new Presidential and Congressional elections within 120 days after NESARA's announcement
- Monitors elections and prevents illegal election activities or special interest groups
- Creates new US Treasury currency, rainbow currency, backed by gold, silver, and platinum precious metals
- Returns Constitutional Law to all our courts and legal matters.
- Initiates new U.S. Treasury Bank System in alignment with Constitutional Law
- Eliminates the Federal Reserve System
- Restores financial privacy
- Retrains all judges and attorneys in Constitutional Law
- Ceases all aggressive, US government military actions worldwide
- Establishes peace throughout the world
- Initiates first phase of worldwide prosperity distribution of vast wealth which has been accumulating for many decades
- Releases enormous sums of money for humanitarian purposes
- Enables the release of new technologies such as alternative energy devices.

Executive Order 13818 of December 20, 2017

Blocking the Property of Persons Involved in Serious Human Rights Abuse or Corruption

By the authority vested in me as President by the Constitution and the laws of the United States of America, including the International Emergency Economic Powers Act (50 U.S.C. 1701 *et seq.*) (IEEPA), the National Emergencies Act (50 U.S.C. 1601 *et seq.*) (NEA), the Global Magnitsky Human Rights Accountability Act (Public Law 114-328) (the "Act"), section 212(f) of the Immigration and Nationality Act of 1952 (8 U.S.C. 1182(f)) (INA), and section 301 of title 3, United States Code,

I, DONALD J. TRUMP, President of the United States of America, find that the prevalence and severity of human rights abuse and corruption that have their source, in whole or in substantial part, outside the United States, such as those committed or directed by persons listed in the Annex to this order, have reached such scope and gravity that they threaten the stability of international political and economic systems. Human rights abuse and corruption undermine the values that form an essential foundation of stable, secure, and functioning societies; have devastating impacts on individuals; weaken democratic institutions; degrade the rule of law; perpetuate violent conflicts; facilitate the activities of dangerous persons; and undermine economic markets. The United States seeks to impose tangible and significant consequences on those who commit serious human rights abuse or engage in corruption, as well as to protect the financial system of the United States from abuse by these same persons.

representations are called tokens. Tokens are most useful when tied to currencies (representing dollars or yuan or euros digitally makes payments borderless and instant) but in theory, on Stellar, you could issue a token for corn bushels or gold or shares of a REIT or an hour of your time as a consultant. In a sense, Stellar offers a generalized

AgaBullion CEO Sarp Tarhanaci stated, "By partnering with Aurus, we can now use their blockchain platform to facilitate fractional gold ownership in Turkey."

"Gold is the oldest decentralized finance system in the world," AgaBullion chairman Gökhan Yılmaz said, "It has become a globally recognized and established ecosystem." He added that since the lack of underlying assets and high volatility renders other cryptocurrencies unreliable, a physically-backed token makes sense.

Gold wholesalers are starting to find new ways to expand their businesses to retail, thanks to blockchain-based tokenization. International bullion trading company AgaBullion and United Kingdom-based fintech Aurus Technologies have signed a partnership to offer gold-backed tokens in the

THE INDOONESIAN GOVERNMENT'S PLAN TO LAUNCH A BLOCKCHAIN-BASED, PRECIOUS METALS-BACKED PAYMENTS AND SAVINGS PLATFORM OUTSIDE THE BANKING SYSTEM...

2:45 AM · Jun 4, 2021 · Twitter Web App

In the near future, Stably and our regulated partners will release more stablecoins backed by other national currencies as well as commodities and precious metals such as gold and silver. We will also expand to other blockchains that have better features such as speed, scalability and security.

Just to let you know: CEO and I had a meeting today, about the precious metals purchasing program. We will do some math and shoot out public announcement on the early next week. Looks like we are going to dress to our buying pants!

👁 23.4K 6:26 AM

- Select cryptos will be backed by physical precious metals or commodities
- New coins & tokens announced constantly

Which Coins Should I Get/Avoid? **GESARA** X

GET THESE (GESARA ASSET NETWORKS)

- ISO20022 International Standardized Coins:
- Flare Network ➡ Xinfín Network, FinX Network
- Flare Finance (DeFi)
- **Stellar Network (most important one)**

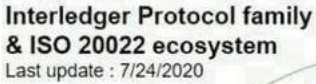

DITCH THESE

- Bitcoin!!! Ethereum, Tether, etc. All Khazarian coins
- 90+% coins will crash during Project Odin (old fork/tech)

WATCH THESE

- Expansion of above GESARA networks
- Upcoming DEXes (Decentralized Exchanges)

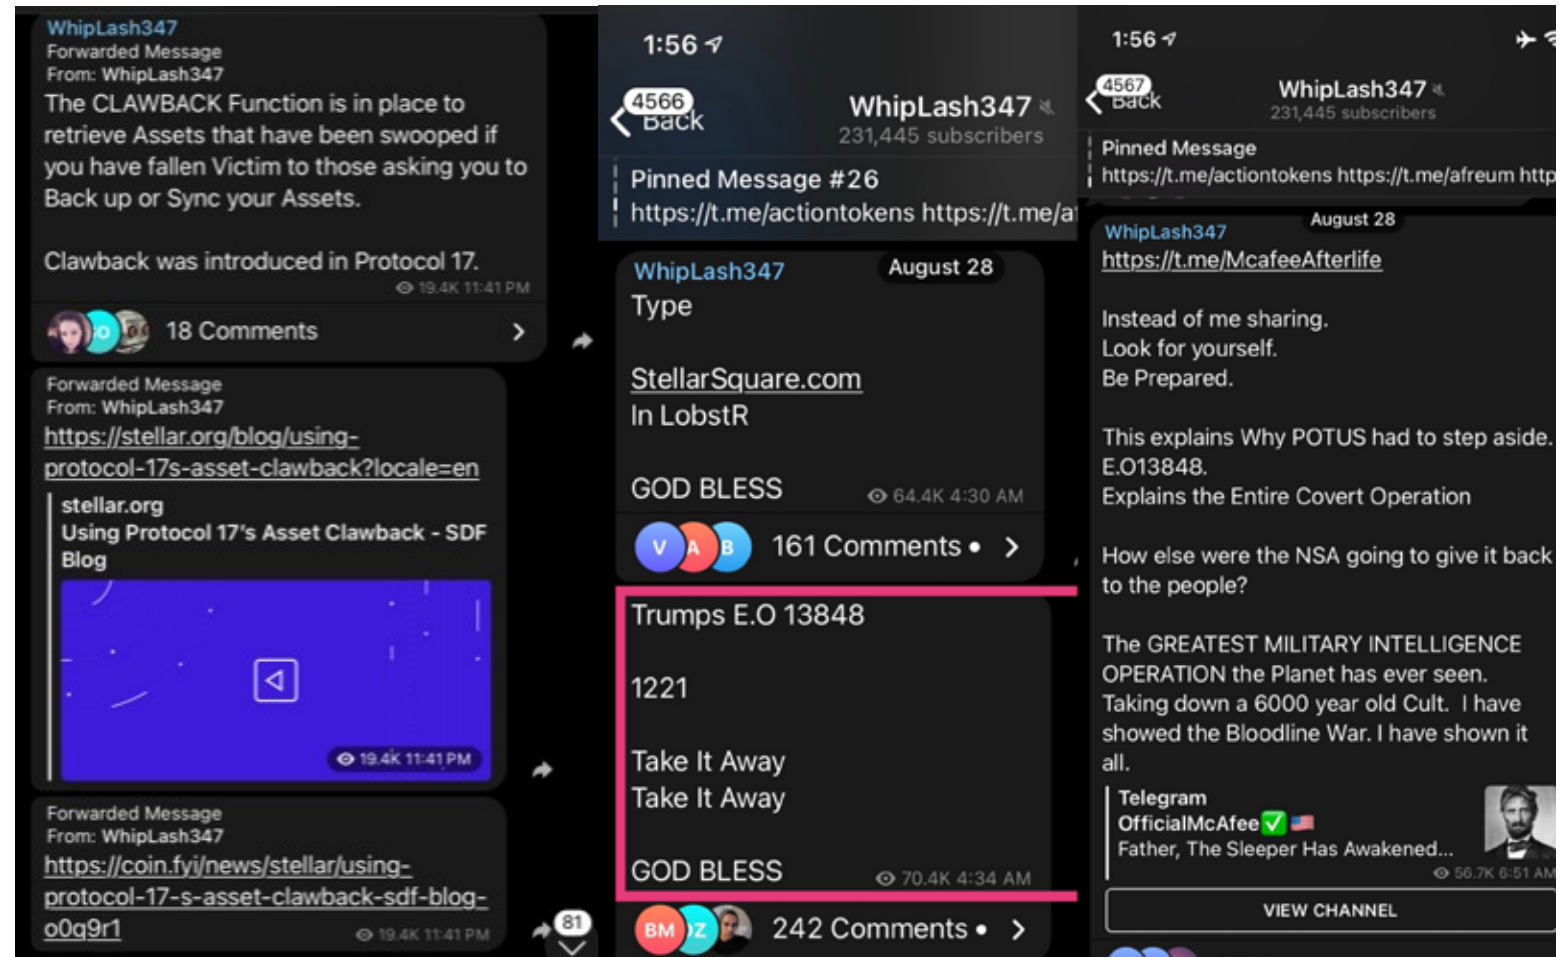

- International standard for electronic data & money exchange between financial institutions
- 5 coins: XRP, XLM, XDC, ALGO, IOTA
- XRP/Flare Network: “institutional coin”, network of smart contracts, removes 3rd party verification, reduces fraud and illegal activities, creates “self-banking” and “self-lending”
- XLM/Stellar Network: “the people’s coin”, will replace FIAT and stock market, for daily exchanges (lifestyle, financial, commodity)
- XDC/XinFin Network: “fintech coin” (VISA/MC), partnered with Flare Network/DeFi (decentralized finance) = bridge between institutional and retail

Stellar Protocol 17 (June 1, 2021) **GESARA** X

- Clawbacks to prevent victimization, limit corruption, comply with **regulation**
- Selected organizations **may** **be** used to facilitate buybacks/redemption = digital RV
- Reddit: Protocol17 Summary

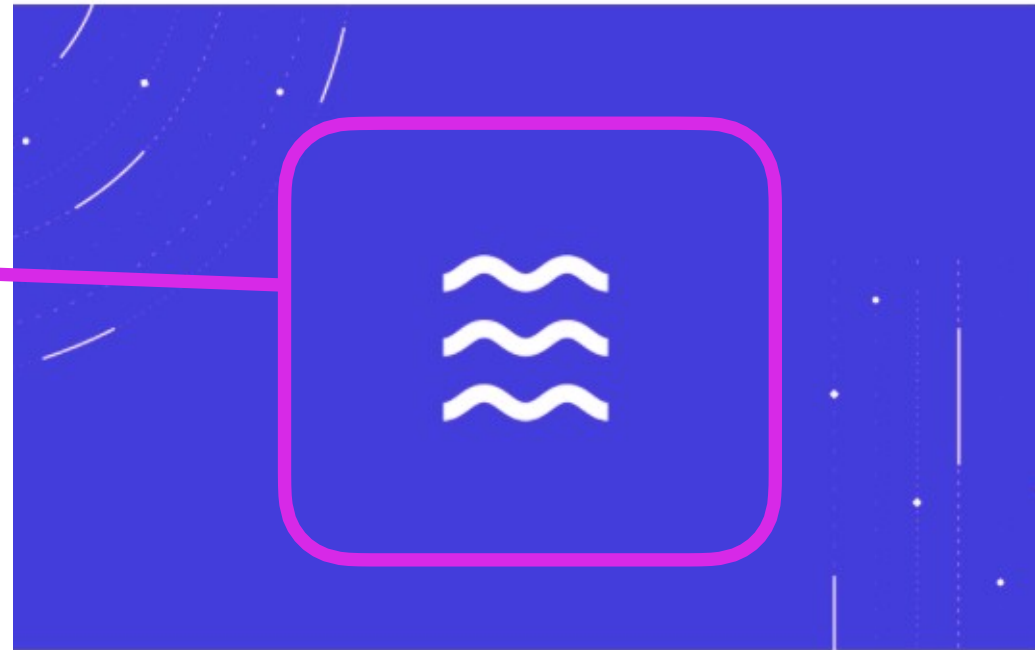

Stellar Protocol 18 (TBD 2021Q4) **GESARA** X

- Automated Market Makers (AMMs) provide needed liquidity to SDEX, automating trades for new and “overlooked” markets
- AQUA Token will be leading AMM integration and liquidity pool
- Testnet beginning early October

Fast Forwarding Stellar AMMs

Justin Rice

Sep 24, 2021

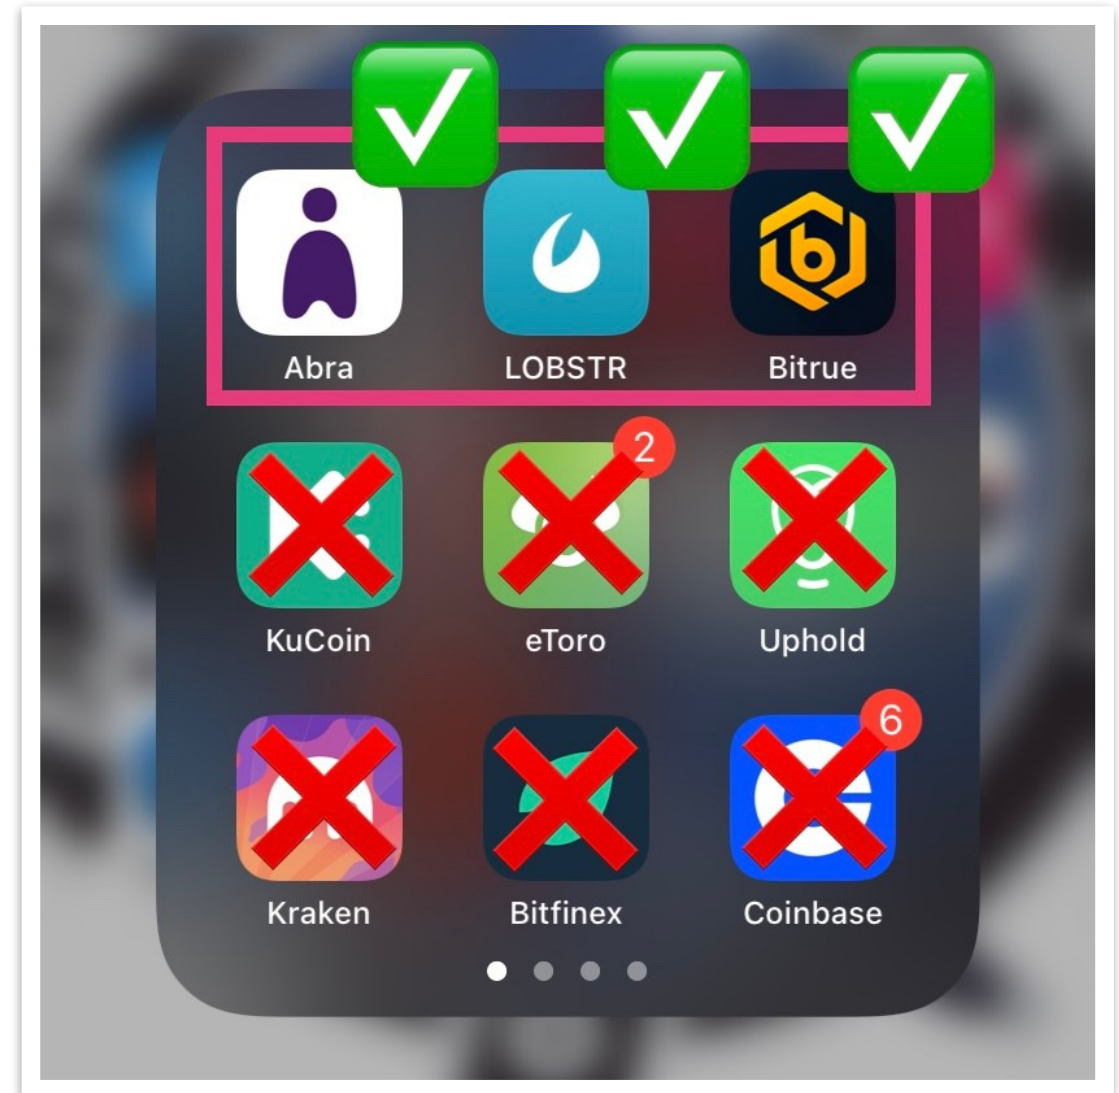

“I think it’s the most exciting Protocol ever!” - Justin Rice, VP of Ecosystem at SDF

It is not just being launched at the protocol level (which means both safe and functional), but it will also have “ecosystem-built interfaces” that **ALLOW USERS TO BOTH POOL AND ACCESS** the liquidity pools to facility exchange and cross-border payments. In other words, **USERS** will help Stellar realize Stellar’s full potential!

<https://twitter.com/StellarOrg/status/1441115848760958978?s=20>

Which Exchanges/Wallets to Use

- Not all coins/tokens can be purchased on all exchanges, please **DO YOUR OWN RESEARCH (DYOR)**
- For buying ISO20022 coins, we recommend:
 - ABRA for XRP, XLM, ALGO
 - Bittrue for exchanging XDC, IOTA
 - Lobstr for Stellar Network tokens (best “bang for your buck” investments)
- For storage, not all wallets can store all coins (so DYOR) but we **recommend moving everything OFF all exchanges** and into hot/cold storage wallets immediately (except Lobstr). **Eventually when all interoperable connections are made, the best place to store EVERY coin/token on EVERY network will be Lobstr so they can be used and secured under the White Hat ecosystem**
- Watch out for freeze periods (timeframe after you purchase and before the exchange allows you to withdraw the asset)

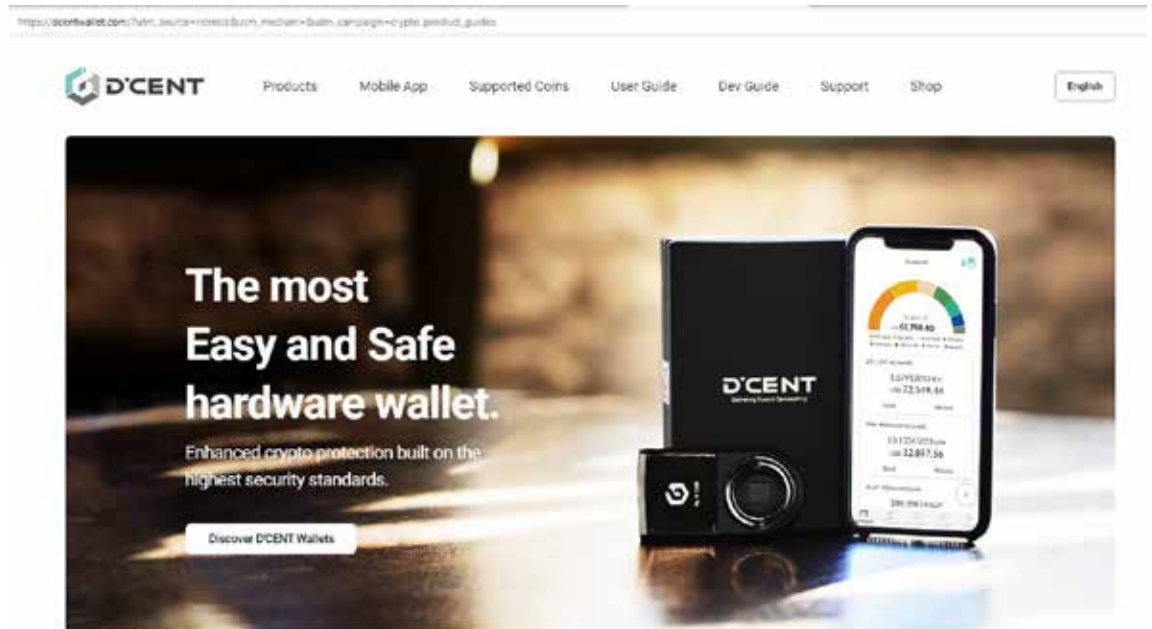

Cold Storage Wallets

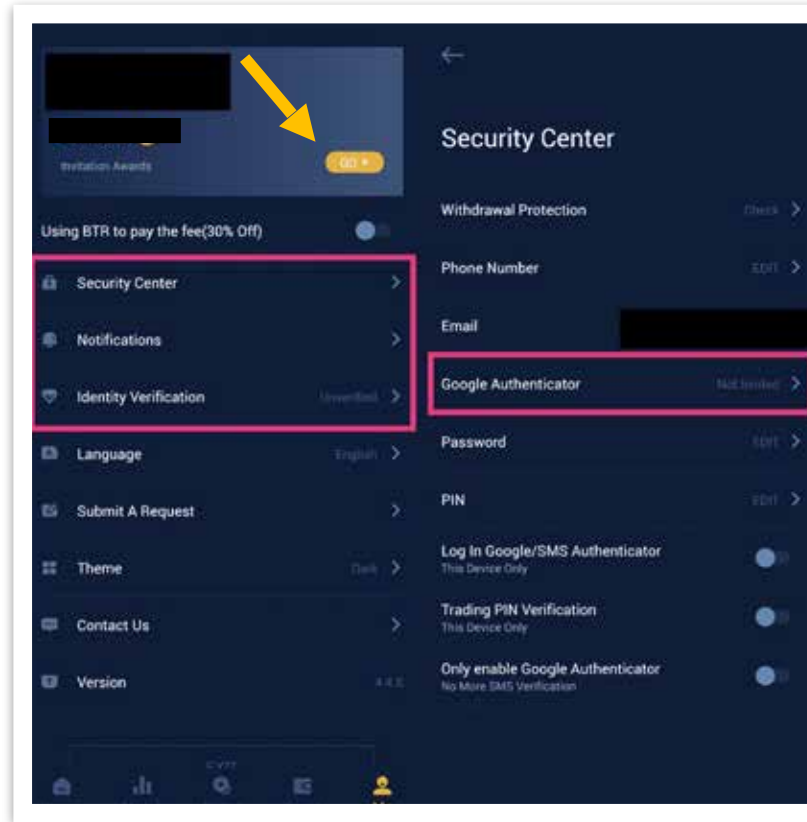

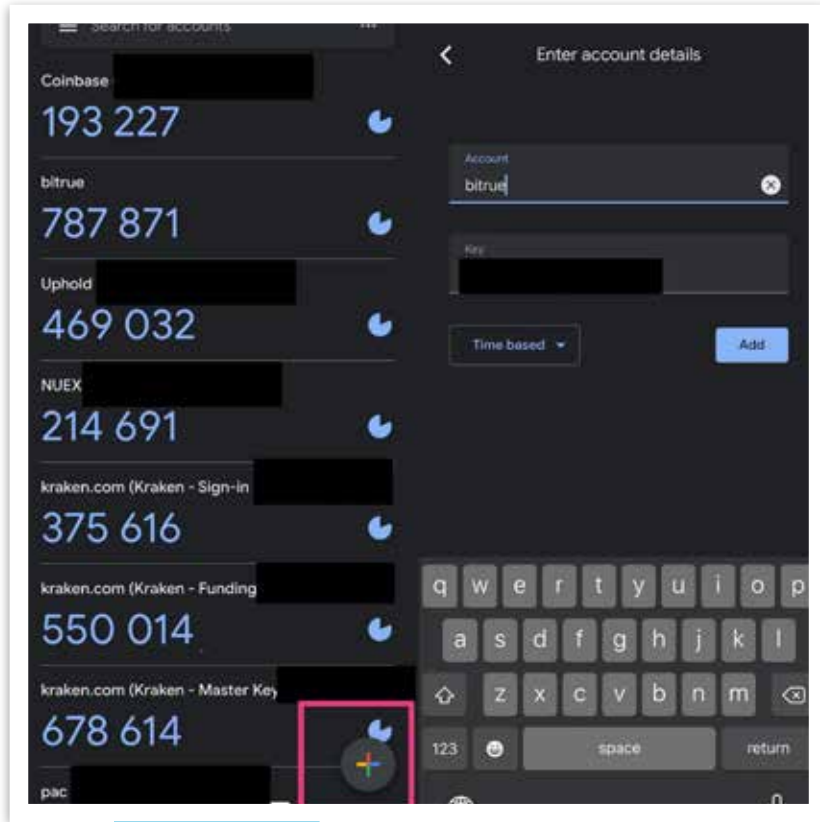

- Cold storage / hardware / offline = MOST secure way to store your crypto, YOU control the “keys”
- Hot storage / software / online = not as secure as Cold Storage, but safer than leaving on an Exchange

Do NOT store your PAPER Passwords in the same place as your Wallet

Enabling Security Features 2FA

- Turn on 2FA (two factor authentication)
- Turn write your PIN, Passwords on **PAPER**
- **NEVER** save your Password online/ device/picture
- **NEVER** share your Passwords and PIN with ANYONE, *not even Customer Support*
