

Crypto101: How Setup and Fund Your Lobstr Account

Creating Your Lobstr Account

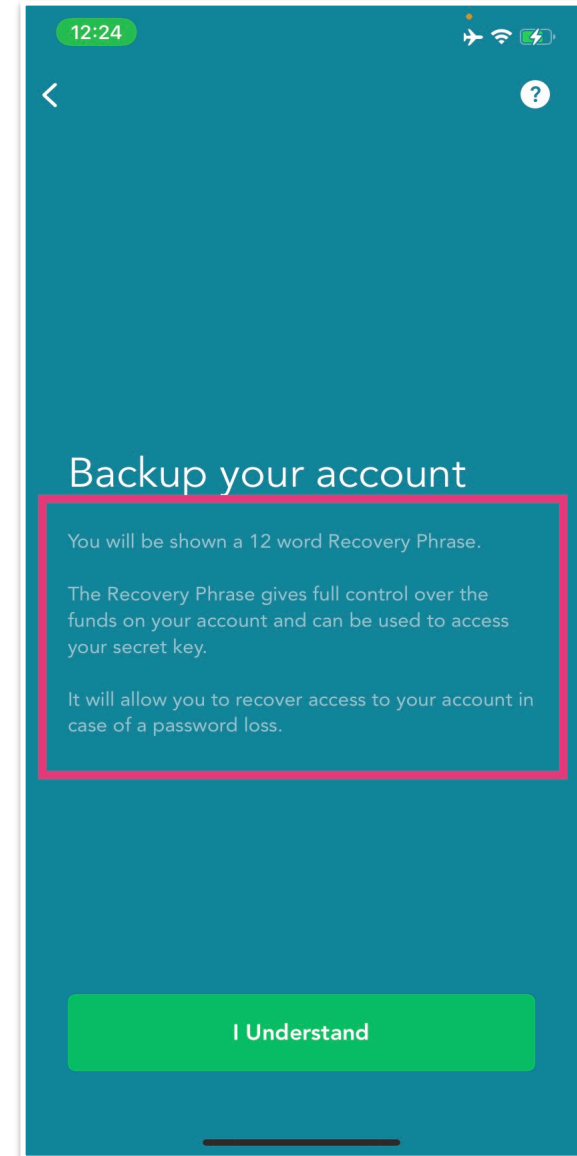

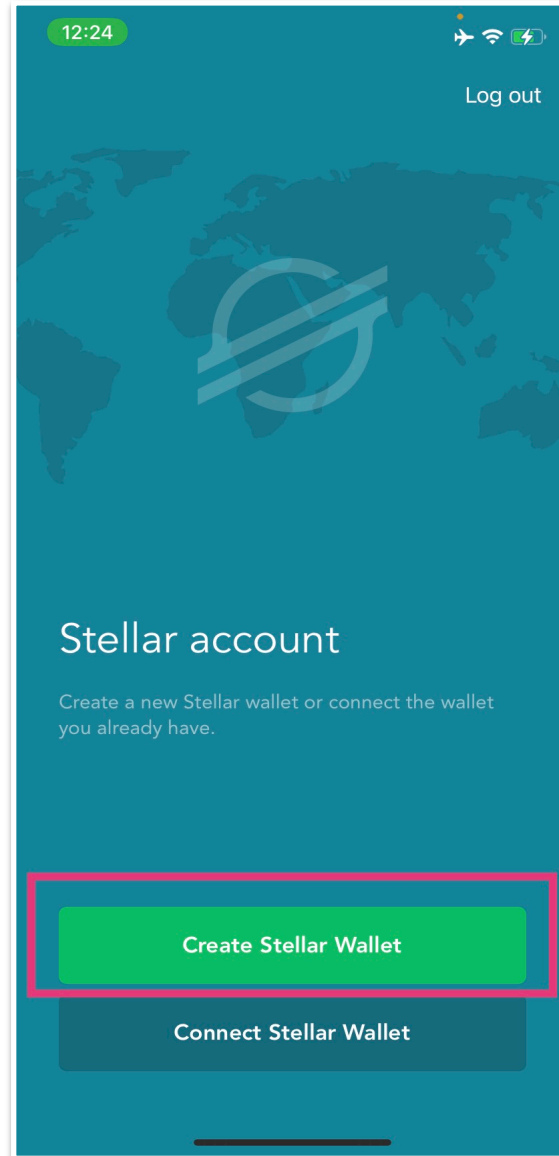

Your Lobstr Recovery Phrase

After you input your personal information, Lobstr will auto-generate a random 12- password Recovery Phrase.

These are the KEYS to your wallet.

Do NOT lose these

Your Recovery Phrase Cont'd

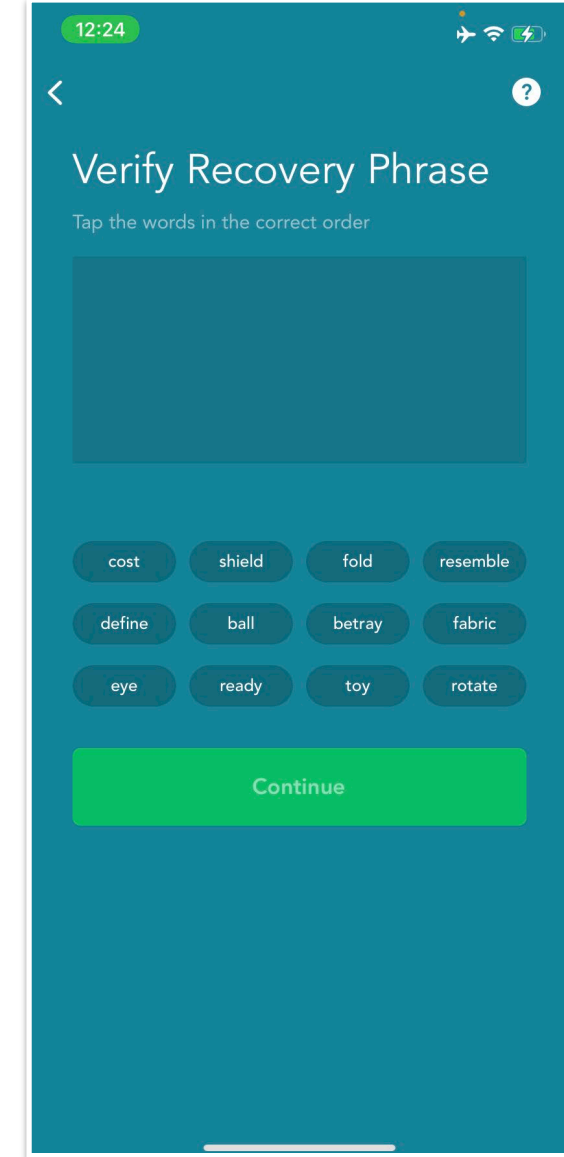

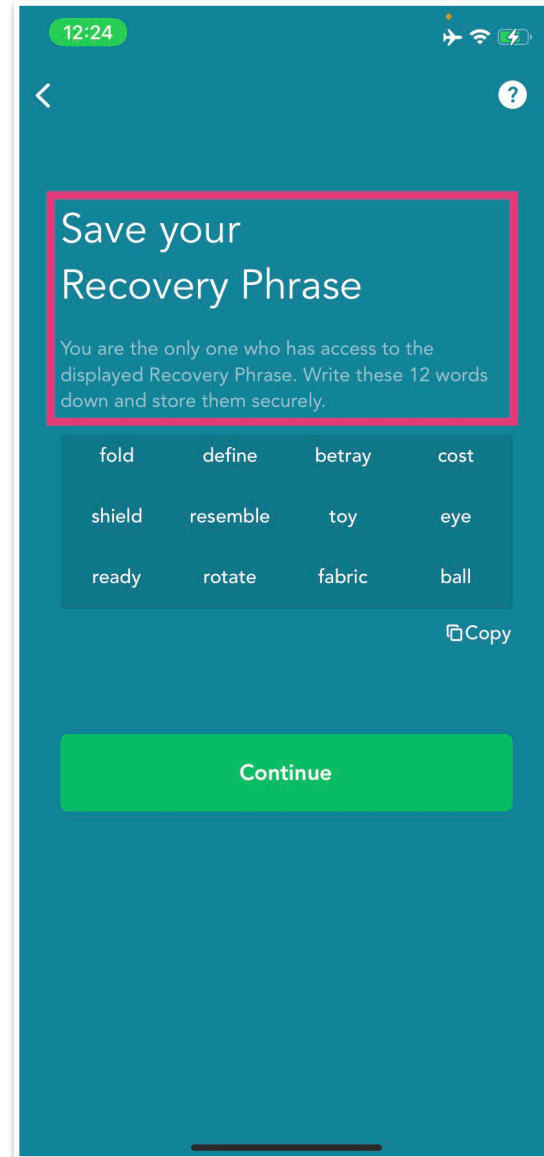

Do NOT lose these KEYS to
your wallet

WRITE THEM DOWN
ON PAPER

DO NOT SAVE THEM
ANYWHERE ONLINE

Your 12 words will be auto-generated, you do not need to choose them. On the next screen you will need to put the 12 words in the correct order to proceed

Funding Your New Lobstr Wallet

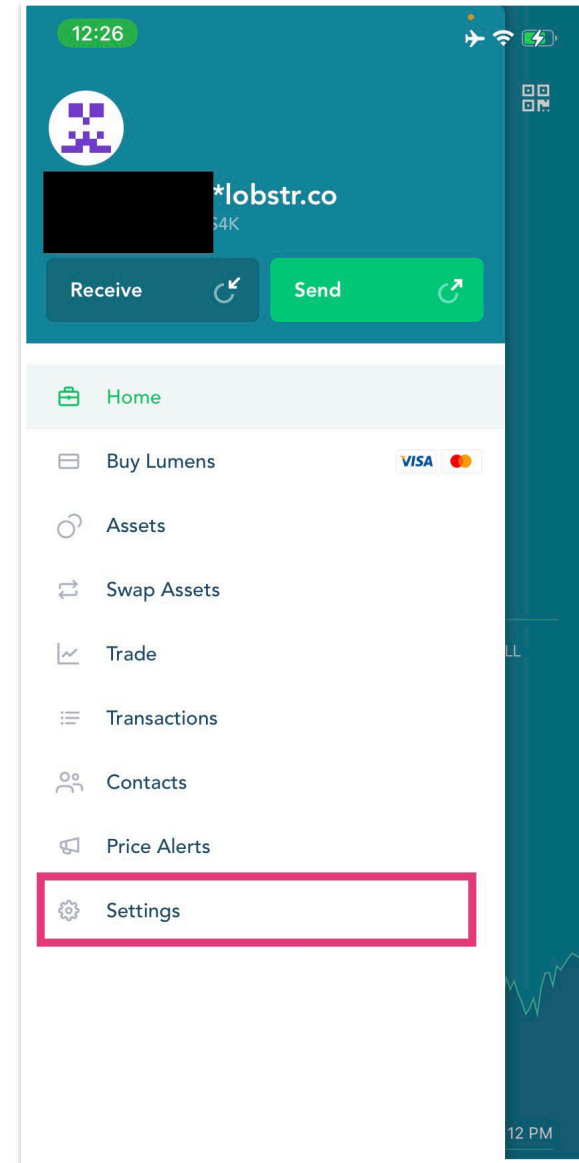

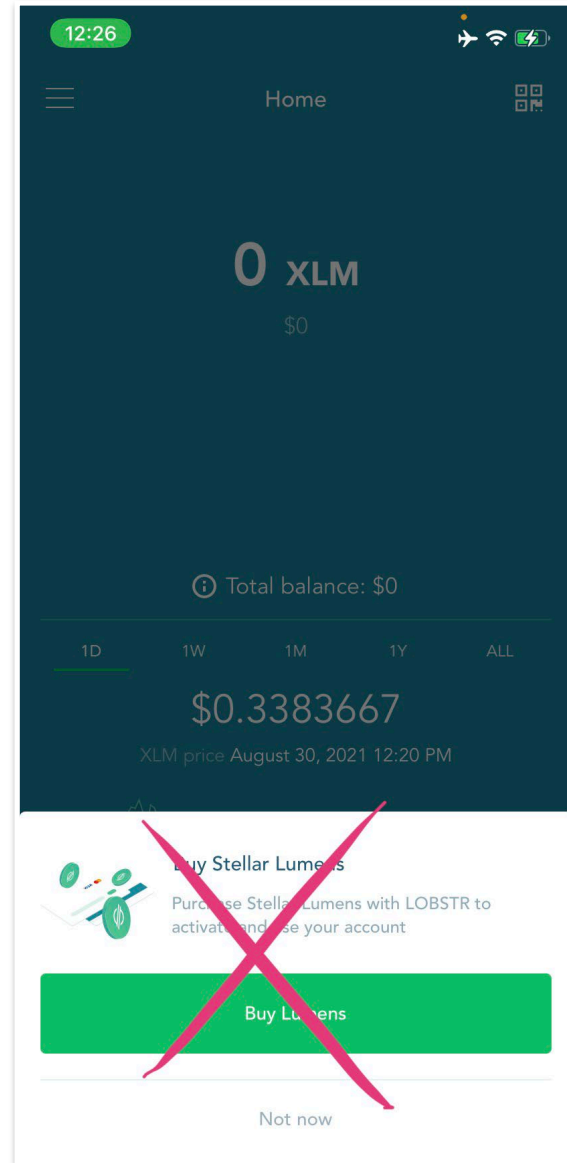

MOST people have issues connecting Moonpay to Lobstr.

This is expected:

Our recommendation is to Create a COINBASE account to purchase XLM and then transfer into Lobstr (or your preferred Stellar Network exchange). XLM Fees are generally very low.

After your account has been created, go to SETTINGS to setup 2FA

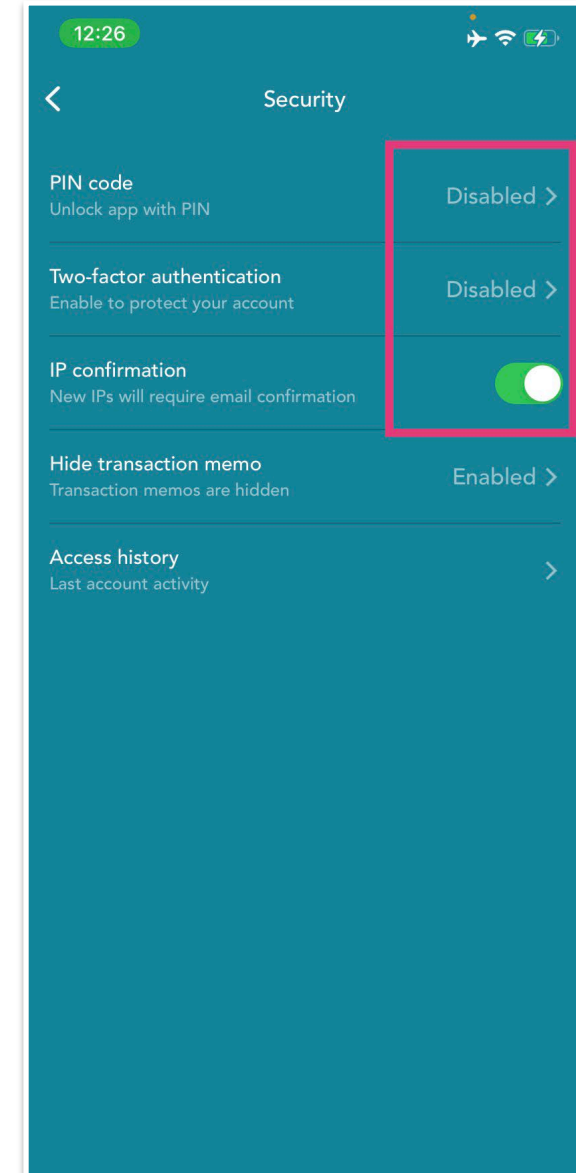

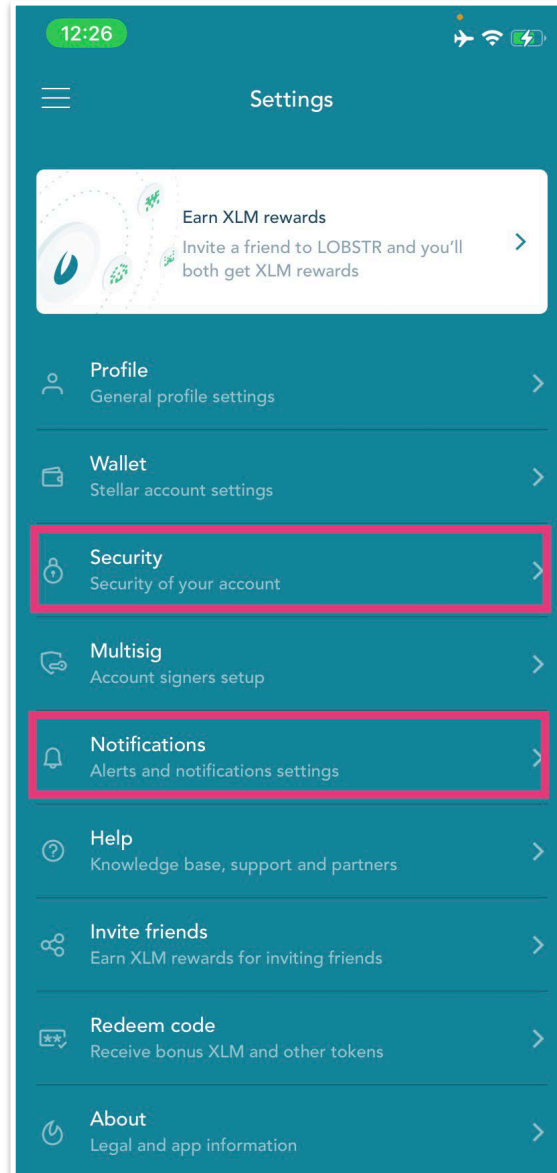

Enabling Security Options

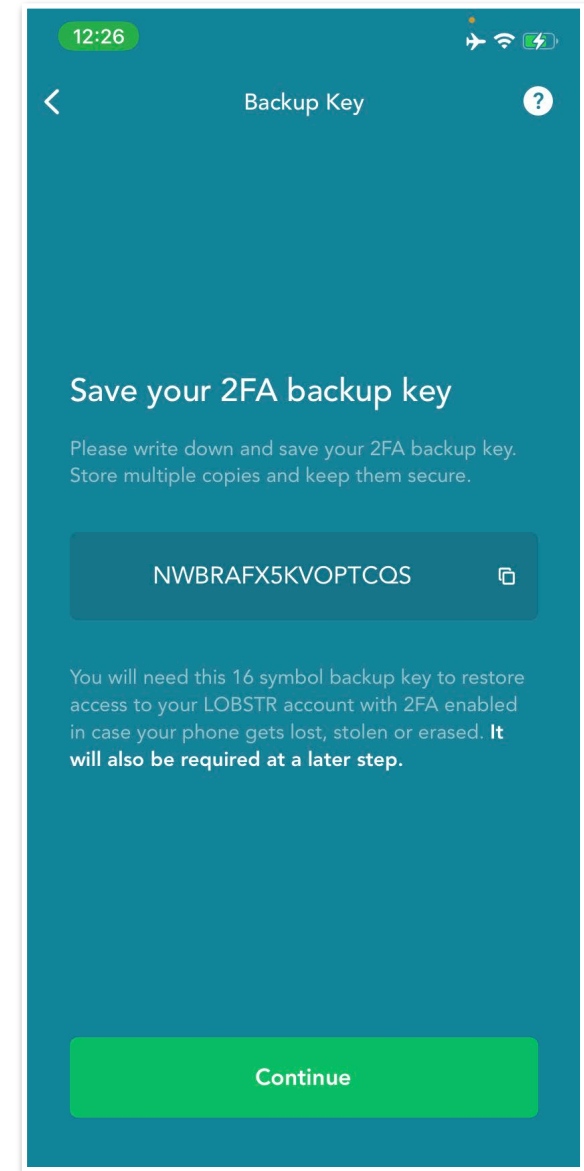

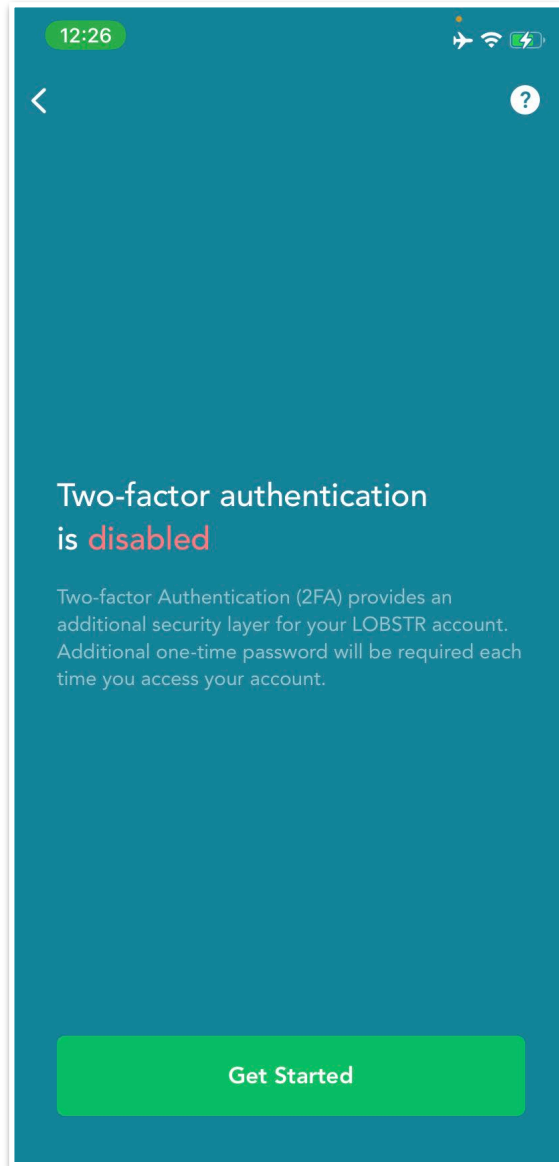

Make sure you enable as many security features as possible, including:

- PIN code
- 2FA
- Notifications (phone and/or email)

Setting up 2 Factor Authentication **GESARA**

Make sure you download a 2FA app such as Google Authenticator or Authy to begin the process of “pairing” your device
