# GESARA X

## Time Saver Tip for Swapping Assets in [Lobstr]

When using the swap function. In this example we will use LGO paired with WHO.

1) Select BOTTOM asset box and use search bar to find and select first asset.

2) Tap ⇅ in the middle to move it to the TOP asset box.

3) Next, select BOTTOM asset box again and select second asset (aka trading pair). Search and select.

4) Select ⇅ to shuffle around which asset you want to buy or sale into.

5) Next, put a "1" in the top box after you have made your selections.

6) This will give you an idea of the swap value based on a 1:(X) ratio.

HAPPY SWAPPING!
